YASH JARIWALA

iOS & Android Developer, Team Lead | +91 9820004296 | yashjariwala@gmail.com | linkedin.com/in/yashjariwala | yashjariwala.github.io

PROFESSIONAL SUMMARY

iOS and Android developer and team lead at Lumens Technologies, Mumbai. For five years I have built Plexilent, a smart-lighting app, from its first prototype to the App Store and Google Play, and since August 2025 I have led the team behind it. I design the screens, write the native code for phones, tablets and watches, and build the cloud services underneath. I like taking a complicated product apart and rebuilding it so simple that anyone can use it.

EXPERIENCE

Team Lead – IoT Applications - Lumens Technologies Pvt. Ltd — Aug 2025 – Present

- Lead development of Plexilent and its brand apps on iOS, iPadOS, Android, watchOS and Wear OS.
- Built a gateway without an MQTT broker: an ESP32-C3 gateway listens to Firebase Realtime Database and relays commands over BLE Mesh, with Cloud Functions for credentials, members, alerts and voice. Almost free for a few users and cost-effective as users grow.
- Built Alexa, Google Home and SmartThings integrations with OAuth account linking. The Plexilent and Uniflow Alexa skills are live; Google Home, SmartThings and IFTTT are in certification.
- Published pyplexilent on PyPI for Home Assistant; added Siri Shortcuts (including Hindi) and Android AppFunctions for Gemini.
- Merged two separate BLE stacks (BLE Mesh and beacon) into one app on shared sync infrastructure.
- Merged the white-label apps into one codebase; a new brand app now takes about a day from configuration.
- Shipped iPad and Android tablet apps, home-screen widgets, Live Activities and watch apps.
- Cut Android mesh switching from 59 s to 5 s and fixed a 265-device network that showed 264 devices offline.

Senior Application Engineer - Lumens Technologies Pvt. Ltd — Apr 2023 – Aug 2025

- Directed the complete redesign of the Plexilent app UI to modern standards.
- Built the app architecture for networks of 6,000+ nodes.
- Bridged Objective-C and Swift on iOS and built reusable UI libraries shared across brands.
- Mentored three junior engineers.
- Built Camera2-based QR scanning on Android.
- Designed Human-Centric Lighting, scheduling and lighting-effects features.
- Managed 10+ industry exhibitions and secured 8 B2B partnerships.
- Ran design, maintenance and security for 6+ company websites (plexilent.com, colossusworld.com, evertstar.in); mitigated DDoS and WordPress attacks; 99.9% uptime.
- Received the “Above and Beyond” award.

Executive – New Product Development - Lumens Technologies Pvt. Ltd — Apr 2022 – May 2023

- Led full lifecycle development of the Plexilent apps: first Google Play release Oct 2022, App Store Jan 2023.
- Directed the migration from Silicon Labs to Telink chipsets, cutting hardware costs by 30%.
- Built login-free mesh sharing with Firebase and QR-based onboarding, removing passwords entirely.
- Managed 5+ industry exhibitions end to end.
- Received the “Made in Lumens” award.

Graduate Trainee - Lumens Technologies Pvt. Ltd — Aug 2021 – Apr 2022

- Researched communication protocols and adopted BLE Mesh for stable, low-internet connectivity in smart lighting.
- Built the first Plexilent app prototypes for Android and iOS, working closely with the firmware team.
- Designed UI/UX workflows and high-fidelity app interfaces in Figma and Adobe XD.
- Presented early product versions at industry exhibitions, securing B2B client interest.

Intern - Magenta ChargeGrid — Sep 2019 – Nov 2019

- Designed EV car-charging circuits and built a database of EV chargers across India.
- Negotiated spare parts and technology with suppliers in China.

PROJECTS

Plexilent Smart Home App (Professional Project)

- Native app on iPhone, iPad, Android, Apple Watch and Wear OS, in 16 languages; 4,190+ commits since July 2022 (99% of the repository).

- Cloud Mesh Sync: networks stored in the cloud with a version number and a provisioner per phone, so shared homes stay in sync and phones never clash on addresses. Joining is one QR scan.
- Also built a native CCTV viewer (RTSP to VideoToolbox), a sensor suite, Bulk OTA with Live Activity, and a web dashboard that turns PDF floor plans into 3D maps.
- Available on the App Store and Google Play; demo videos on YouTube.

White-label Brand Apps (Professional Project)

- One modular codebase behind 10+ brand apps, including Uniflow World, Galaxxy Hub (Kolors), Salt, Bajaj Illumiga, Bajaj Synchronous and Corvi.
- Built the SDK inside Crompton's SENZE smart-device app.
- Kept one consistent experience across Android and iOS while supporting each client's branding, features and integrations.

Smart Street Pole Car Charger (College Project)

- Developed an Android IoT app for street-pole EV charging with real-time tracking, registration and Firebase notifications.
- Designed charger firmware for live consumption reporting and a compact electrical circuit.
- Product demo video: youtu.be/FDqGDD8X_7s.

TECHNICAL SKILLS

Core Technical Expertise

- Mobile Development: iOS (Swift, Objective-C, SwiftUI, Programmatic UI, Xcode, CocoaPods, WidgetKit, App Intents, Live Activities), iPadOS, watchOS, Android (Kotlin, Java, XML, Android Studio, Camera2), Wear OS, MVVM, MVP, SDKs, CI/CD.
- IoT and Embedded Systems: BLE Mesh, Beacons, Wi-Fi, Matter, MQTT, ESP32 Gateway, Firmware (C, C++), Arduino, Lighting Management Systems.
- Backend and APIs: Firebase (Realtime Database, Cloud Functions, Authentication, Crashlytics, App Check), AWS Lambda, REST APIs, API design, Python (PyPI), MySQL, ObjectBox.
- Smart-home Platforms: Alexa, Google Home, SmartThings, Home Assistant, IFTTT, Siri Shortcuts, Gemini AppFunctions.
- Web Development: HTML5, CSS, JavaScript, WordPress.

Leadership and Management

- Team Leadership, Technical Mentoring, Project Planning, Agile/Scrum, Cross-functional Collaboration.
- Product Demonstrations, Exhibition Management, Client Engagement, Vendor and Partner Negotiations.

Tools and Platforms

- Figma, Adobe XD, Lottie; Git/GitHub, Xcode, Android Studio, Firebase Console; AI-assisted development with Claude.
- SEO, Analytics, Social Media Strategy, Cybersecurity and Threat Mitigation.

EDUCATION

Year	Degree	Institution	Percentage
2021	B.E. (Electrical)	SIGCE, Navi Mumbai	74.21%
2018	Diploma	K.J. Somaiya Polytechnic	77.25%
2012	Class X	DAV Public School, Airoli	72.00%

CERTIFICATIONS

- **ANIIT in Cloud & Mobile Software Engineering**
  NIIT Thane, CGPA: 9.0
- **Digital Transformation Program - Java Enterprise Apps with DevOps**
  NIIT Thane, Good
- **Post Graduate Diploma in Industrial Automation**
  Prolific, Thane | Completed
- **Arduino Programming and Hardware Fundamentals with Hackster**
  Udemy | Completed
